Well-balanced Mixer that never moves around thanks to Delta balance

We developed three legs and a triangle body to realize our customer's request "Desired a mixer that is never moving around". We received results that the Mixer did not move around on slippery planes and slopes that were painted with oil.

"Soft touch switch for stirring" and "Continuous stirring" [Se-08]

Switching between the Touch switch that "turns on/off" when the head is lightly pressed and the Continuous stirring. The Touch switch was designed with optimal sensitivity in order to start by light touching.
